Subject: Fw: Active Est. Registration Notification Letter

Dear Kevin:

The computer printout at the end of this letter serves as notification of registration of the pesticide-producing establishment for which you applied, pursuant to Section 7 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA). Each registered establishment is assigned a unique establishment registration number. This establishment registration will remain in effect, provided pesticide reports on production and sales or distribution amounts are submitted annually as required.

Part 167 of the Code of Federal Regulations (40 CFR) requires your company to submit an Initial report for Pesticide-Producing Establishments, EPA Form 3540-16 within 30 days of receipt of this letter. A copy of EPA Form 3540-16 and instructions for filling out the Form are enclosed so that you may complete that requirement. After printing, please sign and date the completed form and return to Mary Summers:

U.S. Environmental Protection Agency
Region 4, Atlanta Federal Center
61 Forsyth Street SW
Atlanta, Georgia 30303

Please retain a copy for your records. We cannot accept emails or faxes. Parts of the 40 CFR which apply to pesticide establishments are enclosed for your reference: (1) Part 167-Registration of Pesticide and Active Ingredient Producing Establishments, Submission of Pesticide Reports and (2) Part 169-Books and Records of Pesticide Production and Distribution.

Failure to submit your Initial report within 30 days may subject your establishment to an administrative civil penalty.

After the Initial Report, future reports must be submitted on a yearly basis. The yearly report forms will be mailed to the company's headquarters mailing address in December of each year. Production reports for establishments registered to produce pesticides and

pesticidal devices are due by March 1st as long as the establishment is active, regardless of whether or not production has occurred (regulations pursuant to Section 7 of FIFRA).

Changes in name, address, or ownership of the company or any establishments are to be reported to this office within thirty (30) days of the change. If your company decides to cease production of all pesticides and pesticidal-devices, you may request inactivation of this establishment. Requests for inactivation of establishments are also to be sent to this office.

The container of each pesticide product which is released for shipment must bear the EPA Establishment Number assigned to the establishment in which it was produced. This number, which is to be preceded by "EPA Est.", may appear in any suitable location on the label or immediate container. It must also appear on the outside container or wrapper of the package if the EPA Establishment Number on the immediate container cannot be clearly read.

If you have any questions, or need help filling out EPA Form 3540-16, please contact Mary Summers at 404-562-8997 or at summers.mary@epa.gov if you prefer e-mail.
